Handleiding

Work SPÆS

Voorbereiding

We design and produce all our furniture ourselves in the Netherlands. Our designs are entirely made of wood. We aim to produce in the most sustainable way, and our production process is set up to produce with the least possible waste. We produce every item after you have ordered it. Above all because we want to minimise our impact on the environment, but also to allow you to order the size you need.

03 | Veel plezier

All our furniture is designed to make it as compact, simple and easy-to-use as possible. And last but not least, that looks great.

We design furniture for small spaces. Furniture to make the most out of the space you have available, even where it seemed impossible.

Whether it is a workspace, side table, speaker stand or an outdoor bench. We create SPÆS.
